

#### APPLICATION AREA

- Transparent calibration hose is used in pipelining installations in the so-called open-end method to press an impregnated liner onto the walls of the pipe to be rehabilitated
- Installation maximum 90° bends
- Also suitable in the manufacture of glued open ends
- Protects the liner in the free space from sharp edges of the pipe
- An excellent alternative for trade fair and educational use, illustrating the installation of a liner
- **Always use over the liner in the free space to prevent excessive swelling of the liner**

#### TECHNICAL INFORMATION

- Tensile strength (seam): 43 N / mm<sup>2</sup>
- Tensile strength (material): 59 N / mm<sup>2</sup>
- Material: PVC
- Application area: DN 50 - 200 mm
- Installation pressure: max. 0,5 bar
- Heat resistance: max. 50 °C
- Weight: 407 g / m<sup>2</sup>
- Color: transparent
- Pack size: 100 m / roll
