

Technical Information  
**Steam Box TD50/150**

Steam mixing unit with hoses  
Total weight 9,2 kg  
Made in EU

#### INSTRUCTIONS FOR USE

1. Turn on the air valve
2. Turn on the steam valve
3. Adjust the pressure and temperature to the required temperature by observing the gauges

#### NOTE

The drain valve must be kept partly open during installation to remove any condensation water.

The pressure increases with the supply of steam.

Ensure that the steam mixer has cooled down completely before disconnecting the hoses.

#### **WARNING!**

Beware of hot surface!  
Beware of burning hot steam and water!
